Release of the Rules for the classification of ships, edition January 2022

CRS is pleased to announce the release of the January 2022 edition of the Rules for the classification of ships which can be downloaded from the following address:

<http://www.crs.hr/rules-imo-and-eu-regulations/crs-rules-and-standards/rules-for-the-classification-of-ships>

CRS Rules are continually revised and updated in order to timely include internationally accepted standards (IACS Procedural requirements (PRs), Unified requirements (URs), Unified interpretations (UIs), IMO, ILO, EU, Flag state requirements, etc.) related to the safety of human life at sea and protection of the sea environment, as far as they concern classification.

CRS publishes and systematically maintains its rules related to design, construction, and maintenance of various types of vessels and their associated essential engineering systems related to:

- Structural strength, and where necessary watertight integrity of all essential parts of the hull and its appendages.
- Safety and reliability of the propulsion and steering system and those features and auxiliary systems for establishing and maintaining basic conditions on board.
- Stability.
- Subdivision
- Fire protection.
- Refrigerating plant.

A full list of CRS Rules currently being in force is attached.
